

Hey what the !!!!!Why let the money vultures win every thing around the US. It's not just the radio stations wanting to push their intent on people just to make a fast buck or two..Try the the ever popular Oil companyies who lobbied and have a law passed that anything that jeopordize the uses of fossil fuels is consitered unlawful. Getting back to the matter at hand there are way too many bullies out there too big for their brichies trying their hardest to monopolize the market.. We all know what happen there..Bill Gates ring any bells..Why does the world have to be this way...WHY!!!! (Wish this world would get a grip because most of the end of the bible is coming true..)

Everybody against everybody..If it wasn't for the local news and traffic reports we the 1.7 million would cause more pollution by sitting on the US freeways smogin up the place....Now wouldn't it be funny if the 1.7 million owned all electric cars.....Then the oil companies would be lobbying against that wouldn't they.. So please leave XM alone aleast they are bettering themsevles compared to regular radio (bunch of talk, rap and comercials that don't pertain to whats going on).. Me person I can't stand listening to the top 10 day in day out...
